Class 10 UHS-I

The microSDHC™/microSDXC™ cards are the standard solution to expand the memory of tablets, smartphones, drones and action cameras.

S3+® Class 10 UHS-I microSDHC™ and microSDXC™ cards are designed for maximum reliability, making them perfect for Full HD (1080p) shooting and high-resolution photo shooting with Android™ smartphones and tablets. The full SD adapter also makes them ideal for Point-and-Shoot cameras and video cameras.

Ten times smaller than a standard SD card, microSDHC™/microSDXC™ memory cards are tiny and powerful. Class 10 UHS-I (U1) introduced by the SD 3.0 specification introduced by the SD Card Association, guarantees a minimum write speed of 10MB/s. Thanks to the perfect combination of small size, speed and memory capacity up to 128GB, they are perfect for 3D video and full-HD (1080p) cinema quality.

### Safety and reliability

The MicroSDHC™ and MicroSDXC™ Class 10 memories of the S3+® incorporate the ECC (Error Correction Code) technology that automatically detects and corrects errors during data transfer.

### Maximum flexibility

When used with the included adapter, these memories can be used as full size SDHC™ and SDXC™ cards. To check card compatibility make sure that the corresponding logo is on the host devices (such as mobile phones, tablets and cameras).
